Neural, Parallel & Scientific Computations

Volume 20, 2012

CONTENTS

George A. Anastassiou **1**
Multivariate Voronovskaya Type Asymptotic Expansions for Normalized
Bell and Squashing Type Neural Network Operators

Pijush Kumar Koley and Srimanta Pal **11**
Comments on "Quantum Networks for Elementary Arithmetic Operations"

Reza Habibi and Hamed Habibi **17**
Applications of Bootstrap Method in Neural Networks

E. V. Grigorieva, N. V. Bondarenko, E. N. Khailov, and A. Korobeinikov **23**
Three-dimensional Nonlinear Control Model of Wastewater Biotreatment

Peter Stechlinski and Xinzhi Liu **37**
Control Strategies Applied to a Stochastic Disease Model with Term-time Forcing

K. R. Prasad and N. Sreedhar **51**
Multiple Symmetric Positive Solutions for Sturm-Liouville Two-point
Boundary Value Problems on Time Scales

Pijush Kumar Koley and Srimanta Pal **65**
On Quantum Computation of Statistical Mean Using
Grover's Algorithm

R. K. Mohanty, Rajive Kumar and Vijay Dahiya **81**
Spline in Tension Methods for Singularly Perturbed One Space
Dimensional Parabolic Equations with Singular Coefficients

D. Venkatesan, Michele Gallo and M. Vijayakumar **93**
A Bayesian Analysis of Multiple Changes in the Variance
Of First- Order Autoregressive Time Series Models.

Yahia Makableh and Fernando Rios-gutierrez **101**
Intelligent Cruise Control Using an Efficient PID Model Neural Network

Choon Ki Ahn **111**
Analysis of L_2 . L_∞ Stability for Multilayer Hopfield Neural Networks

Th. T Pham, J. D. Ramírez, and A. S. Vatsala **119**
Generalized Monotone Method for Caputo Fractional Differential
Equation with Applications to Population Models

Mohan K. Kadalbajoo and Puneet Arora **133**
Fitted Collocation Method for Convection-diffusion Problems with Two Small Parameters

A. Krishnamoorthy and Varghese Jacob **153**
Analysis of Customer Induced Interruption in a Multi Server System

Justin B. Munyakazi and Kailash C. Patidar **173**
An Efficient Numerical Method for a System of Singularly Perturbed Reaction-diffusion Equations

Aymeric Kalife, Xiaolu Tan, and Lihang Wang **191**
Dynamic Hedging by a Large Player: from Theory To Practical Implementation

Zvi Retchkiman Konigsberg **215**
The Biological Competition Problem

Alexis Kirke and Eduardo Miranda **227**
Pulsed Melodic Affective Processing - Using Music for Natural Affective Computation and Increased Processing Transparency

K. Sita Devi, T. Ponnarasi, and C. Prabakar **241**
Estimation of Household Demand Through Almost Ideal Demand System Model

Jewgeni H. Dshalalow and Randy Robinson **249**
Fluctuations of a Nonmonotone Marked Point Process under a Time Constraint

S. Shemehsavar and S. Rezakhah **263**
Random Algebraic Polynomials with Increasing Variance of the Coefficients

C. S. Ryoo **271**
Calculating Zeros of the Second Kind (H, Q)-Bernoulli Polynomials

Joë l Chaskalovic and Franck Assous **283**
A New Method to Evaluate Asymptotic Numerical Models by Data Mining Techniques

Hong Xiang, Zhan-Ping Ma, and Hai-Feng Huo **291**
Dynamics of a Beddington-Deangelis Predator-Prey Model with Stage Structure

A. V. Vasilyev and V. B. Vasilyev **313**
Numerical Analysis for Some Singular Integral Equations

N. G. Medhin and G. L. Porter **327**
Control Theory Methodology for Social Networks: Prediction of Missing Links

Lev Ryashko **349**
Minimization of the Estimation Error by Control in Systems with Multiplicative Noise

Noel. C, Sheila. H, Zenia. N, Dayonna. P, Jasmine. W, A. S. Vatsala, and Sowmya. M **359**
Numerical Application of Generalized Monotone Method for Population Models

Zvi Retchkiman Konigsberg **373**
Modeling and Stability Analysis of Fault Queueing Systems

Srimanta Pal **385**
Sorting: a Mathematical Mapping

Jyoti Talwar and R. K. Mohanty **399**
Smart Alternating Group Explicit Method (SMAGE) for the Cubic Spline Solution of Non-linear Two Point Boundary Value Problems

Nikita Setia and R. K. Mohanty **415**
A New High Accuracy Variable Mesh Discretization for the Solution of the System of 2d Non-linear Elliptic Boundary Value Problems

T. Feagin **437**
High-order Explicit Runge-Kutta Methods Using M-symmetry

J. L. Santos, W. S. Yousif, and M. M. Martins **459**
The Explicit Group TOR Method

Wafik A. Wassef **475**
Time Series Prediction and Hardware of the Extended-Input Neural Network (EINN)

Content **485**

Author Index **489**
