

Neural, Parallel & Scientific Computations

Volume 21, 2013

CONTENTS

Jean-claude Pedjeu and G. S. Ladde Numerical Methods for Stochastic Fractional Differential Equations	1
Sowmya Muniswamy and Aghalaya S Vatsala Numerical Approach via Generalized Monotone Method for Scalar Caputo Fractional Differential Equations	19
K. R. Prasad, P. Murali, and N. V. V. S. Suryanarayana Upper and Lower Solutions for General Two-point Boundary Value Problems on Time Scales	31
Irina Bashkirtseva and Lev Ryashko Stabilization of Invariant Manifolds For Nonlinear Stochastic Systems	43
Dimitris Papaioannou and Anastassios Tassopoulos Decision Making Strategies for Environmental Management	51
Narayan Chandra Deb Atmospheric Pattern Classification Using Neural Network	67
M. I. Soliman, M. T. El-Melegy, and A. F. Al-Junaid Cycle Accurate Models for Investigating the Scalability of Mat-Core Processor	87
Mostafa I. Soliman Exploiting the Capabilities of Intel Multi-Core Processors for Block QR Decomposition Algorithm	111
S. Shemehsavar and S. Rezakhah Fatigue Failure Analysis of Non-Stationary Gaussian Stress Process: Random Algebraic Polynomials	129
Jewgeni H. Dshalalow and Ryan White On Reliability of Stochastic Networks	141
Chuang Peng Distributive Laws and the Algebraic Structure of Fuzzy Numbers	161
Jeffrey Matayoshi An Application of Random Polynomials to Wireless Communications	173

Srimanta Pal Dynamic Minimum Spanning Circle Computation Using Artificial Immune Computing Paradigm	185
Nabin K. Manandhar Shrestha and K. M. Ramachandran Classification of Cancers by Microarray Gene Expression Data Using the Behrens-Fisher Statistic	201
Eihab B. M. Bashier and Kailash C. Patidar An Efficient Fitted Operator Method to Solve Delayed Singularly Perturbed Differential-Difference Equations	217
A. V. S. Suhasini, K. Srinivasa Rao, and P. R. S. Reddy Transient Analysis of Parallel and Series Queueing Model with Nonhomogeneous Compound Poisson Binomial Bulk Arrivals and Load Dependent Service Rates	235
Anil Patnaik, Ashenafi Hegana, and T. S. Srivatsan Computations and Detailing of Pressure Vessels Having Unusual Requirements in Design	263
W. S. Yousif, J. L. Santos, and M. M. Martins Explicit Group Ussor Method for Solving Elliptic Partial Differential Equations	279
Alpesh Kumar, Lok Pati Tripathi, and Mohan K. Kadalbajoo A Numerical Study of European Options under Merton's Jump-diffusion Model with Radial Basis Function Based Finite Differences Method	293
Phoolan Prasad Fermat's and Huygens' Principles, and Hyperbolic Equations and Their Equivalence In Wavefront Construction	305
K. P. Mohanan, A. K. Nandakumaran, D. Roy, and Ram Mohan Vasu Quantitative Ultrasound-Modulated Optical Tomography: a Direct Gauss-Newton Approach to Recover Elasticity Distribution from the Measured Intensity Autocorrelation	319
S. Chandra Sekhara Rao and Sunil Kumar A Hybrid Difference Scheme for Singularly Perturbed Semilinear Reaction-Diffusion Problems	335
Sowmya Muniswamy and Aghalaya S Vatsala Numerical Approach via Generalized Monotone Method for System of Caputo Fractional Differential Equations	347
M. Panchatcharam, S. Sundar, and A. Klar GPU Metrics for a Linear Solver	361
T. Gnana Bhaskar, S. Hariharan, and Neela Nataraj Heatlet Approach to Diffusion Equation on a Semi-Infinite Region	375

R. K. Mohanty, Navnit Jha, and Vinod Chauhan Arithmetic Average Geometric Mesh Discretizations For Fourth and Sixth Order Nonlinear Two Point Boundary Value Problems	393
N. G. Medhin and M. Sambandham Discrete Dynamic Control of an Impulsive SIR Model	411
Lawrence F. Shampine Alternative to Gauss-Kronrod Quadrature	419
V. Subburayan and N. Ramanujam An Asymptotic Numerical Method for Singularly Perturbed Convection-Diffusion Problems With a Negative Shift	431
B. V. Rathish Kumar and S. V. S. S. N. V. G. Krishna Murthy Free Convection in a Non-Newtonian Fluid Saturated Square Porous Enclosure with an Isothermal Corrugated Wall	447
B. Deka, R. K. Sinha, R. C. Deka, and T. Ahmed Finite Element Method with Quadrature for Parabolic Interface Problems	477
Raju K. George and Mohan C. Joshi Operator Theoretic Approach to Optimal Control Problems Described by Nonlinear Differential Equations	497
Kamal Jeet and D. Bahuguna Controllability of the Impulsive Finite Delay Differential Equations of Fractional Order With Nonlocal Conditions	517
C. Y. Chan and J. C. Carrillo Escobar Blow-Up Set and Time for a Singular Semilinear Parabolic Problem Due to a Concentrated Nonlinear Source	533
R. M. Thurman and G. S. Ladde An Epidemiological Growth Model: Derivation, Properties, and Parameter Estimation	543
Jyoti Talwar and R. K. Mohanty Spline in Compression Method for Non-linear Two Point Boundary Value Problems on a Geometric Mesh	553
Content	571
Author Index	575
