Neural, Parallel & Scientific Computations

Volume 24, 2016

CONTENTS

Swarn Singh, Suruchi Singh, and Rajni Arora **1**
New Highly Accurate Stable Schemes for the Solution of Telegraphic Equation with Neumann Boundary Conditions

Yumi Yahagi **15**
A Probabilistic Consideration on One Dimensional Keller Segel System

Zvi Retchkiman Konigsberg **29**
Computability Power of an Extended Petri Net Model (APN)

Anwar Zeb, Sultan Hussain, Vedat Suat Erturk, and Gul Zaman **45**
Asymptotic Behavior of Different Controls of Hepatitis B Virus

Jewgeni H. Dshalalow, Kenneth Iwezulu, and Ryan White **55**
Discrete Operational Calculus In Delayed Stochastic Games

Heyuan Wang **65**
Dynamical Behaviors Analysis And Numerical Simulation of the Lorenz-Type System for Couette-Taylor Flow

Venkateswara Rao Mudunuru **83**
Comparison of Activation Functions In Multilayer Neural Networks for Stage Classification in Breast Cancer

Soudabeh Shemehsavar and Kambiz Farahmand **97**
Expected Number of Real Roots of Certain Gaussian Random Trigonometric Polynomials

C. Sreenivasan and A. Krishnamoorthy **107**
MAP/PH/1 Retrial Queue with Constant Retrial Rate, Working Vacations and a Finite Buffer for Arrivals

Anwar Zeb, Sultan Hussain, Syed Inayat Ali Shah, and Gul Zaman **121**
Asymptotic Behavior of Stochastic Hepatitis B Model with Different Controls

Jinhui Li and Zhidong Teng **131**
Dynamic Analysis of a Stochastic Transmission Model for Echinococcosis

Deniz Ilalan **147**
Numerical Estimation of Uncertainty Principle For L Evy Driven Ornstein Uhlenbeck Processes In Finance

Elife Dogan-ciftci and Ummugul Bulut **163**
Derivation of Stochastic Biased and Correlated Random Walk Models

Kunwer Singh Mathur and Joydip Dhar **181**
Stability Switches and Bifurcation Analysis of a Food Chain Stage-Structured Model with Impulsive Pest Management Strategy

Ramesh VP, Prithvi M, and Thatchaayini R **209**
Strongly Unequal Permutations of Sn and Sudoku

Dongfang Yun **225**
Least Squares Integration-based RBF Method for Solving Partial Differential Equations

Quanyong Zhu and Quanxiang Wang **243**
Numerical Study of a Stochastic Damped Wave Equation

S. Mckee, Jose A. Cuminato, and R. K. Mohanty **269**
On the Convergence of a Finite Difference Scheme For a Second Order Differential Equation Containing Nonlinearly a First Derivative

Xiao Zhao **277**
On Solving Optimization-Constrained Differential Equations by Using KKT Conditions

Santosh Kumar, Mohd. Sarfaraz, and M. K. Ahmad **305**
An Efficient Pde-based Nonlinear Anisotropic Diffusion Model for Image Denoising

Legesse L. Obsu, Anne Meurer, Semu M. Kassa, and Axel Klar **317**
Modelling Pedestrians' Impact on the Performance of a Roundabout

Clayton Reakes, Xiaosheng Gao and T. S. Srivatsan **335**
Analysis of Threaded Fasteners of a High Strength Steel: Role of Flaw Size and Orientation - a Numerical Study

Amit Kumar and Mangey Ram **351**
Performance Analysis of Pulping and Screening System of a Paper Production Plant

Ahmad Jafarian and Safa Measoomy Nia **369**
An Application of Anns on Power Series Method for Solving Fractional Fredholm Type Integro-Differential Equations

Ali Hakan Torc **381**
Hyperbolic Smoothing Method for Sum-Max Problems

Nagehan Alsoy-Akgun **393**
Dqm Solution of Natural Convection Flow of Water-Based Nanofluids

Ozge Colakoglu Havare and Hamza Menken **409**
Some Properties of Th q-Extension of the p-Adic Beta Function

Nihal Yokus and Nimet Coskun **419**
Jost Solution and the Spectrum of the Discrete Sturm-Liouville Equations with Hyperbolic Eigenparameter

Nazish Shahid **431**
Effects of Thermal Radiation and Mass Diffusion On MHD Flow over a Vertical Plate Applying Time Dependent Shear to the Fluid

C. S. Ryoo, R. P. Agarwal, and J. Y. Kang **453**
Differential Equations Arising from Bell-Carlitz Polynomials and Computation of Their Zeros

Hamid Semiyari and Douglas S. Shafer **463**
Symbolic Iterative Solution of Volterra Integral Equations

M. Chandru and V. Shanth **473**
An Asymptotic Numerical Method for Singularly Perturbed Fourth Order ODE of Convection-Diffusion Type Turning Point Problem

Belhedi Wiem, Ben Messaoud Mohamed Anouar, and Bouzid Aicha **489**
Single Channel Speech Separation Based on PCA and Fuzzy Logic

R. K. Mohanty and Gunjan Khurana **505**
A Class of Methods for the Numerical Solutions of 3D Multi-Harmonic Elliptic Equations on a Graded Mesh

Content **523**

Author Index **527**
