

Neural, Parallel & Scientific Computations

Volume 25, 2017

CONTENTS

Haiyan Tian and Andreas Grunewald A Delta-Shaped Basis Method for Ill-Posed Nonhomogeneous Elliptic Boundary Value Problems	1
W. Y. Chan and H. T. Liu Finding the Critical Domain of Multi-Dimensional Quenching Problems with Neumann Boundary Conditions	19
Ratnan Boonklurb, Artit Siriroop, and Tawikan Treeyaprasert Sufficient Conditions for Multi-Dimensional Blow-Up Problem	29
Ling Hei Yeung and Manwai Yuen Some Analytical Solutions for the Euler and Euler-Poisson Equations	37
Wei Zhao and Martin Stoll Stability on Interpolation of Scattered Data via Kernels	45
Dongfang Yun Least Squares Integration-Based RBF Method for Solving Partial Differential Equations	61
Ka Chun Cheung and Leevan Ling Meshless Collocation Methods with Graph Laplacian for PDES on Folded Surface	79
B. Khatri Ghimire, A. R. Lamichhane, D. Watson, and Z. Zhou Solving Fourth-Order Partial Differential Equations Using Radial Basis Function Collocation Methods	91
Douglas Ks Ng, Anita Sm Wong, and Fion Wk Cheung Cancer Growth Models and its Treatment	107
Siqing Li, Ming Li, and G. R. Liu Convergence Analysis and Upper Bound Property of NS-RPIM with Pure RBFS Using Voronoi Smoothing Domains	115
Thir Dangal and C. S. Chen The Method of Particular Solutions for Finding Critical Domains for Quenching Problems	135
Prosenjit Sen, Alakes Maiti, and G. P. Samanta Dynamics of a Symbiotic Model with Herd Behaviour and Strong Allee Effect	149

C. S. Kouzinopoulos, P. D. Michailidis, and K. G. Margaritis Parallel Two-Dimensional Pattern Matching Algorithms Based on GPU	165
Claris Shoko, Delson Chikobvu, and Winston Garira Time-inhomogeneous Markov Modelling of HIV/AIDS Progression in South Africa	181
Abhinandan Chowdhury and Mark Delcambre A Semi-Analytical Approach to Determine the Velocity Potential Around Two Spheres in Arbitrary Motion Through an Ideal Fluid	195
Zvi Retchkiman Konigsberg Modelling and Verification Analysis of the Biological Interaction Between Species via a First Order Logic Approach	213
Denis Bosq and Delphine Blanke Detecting Change-Points for Poisson Processes with Functional Data	229
Hassina Arroudj, Idir Arab, and Abdelnasser Dahmani Strongly Mixed Random Errors in Mann's Iteration Algorithm for a Contractive Real Function	251
George A. Anastassiou Arctangent Function Based Banach Space Valued Neural Network Approximation	263
Pradeep G. Chhetri and Aghalaya S. Vatsala The Convergence of the Solution of Caputo Fractional Reaction Diffusion Equation with Numerical Examples	295
Vasilios Alexiades, Mustafa Zeki Elmas, and Gladys Alexandre Band formation in bacterial aerotaxis	307
Mohd Younus Bhat Wavelet packets with their Fourier properties on local fields of prime characteristic	313
Mitra Devkota and Gary Hatfield Spatial modeling techniques	325
Frederique Drullion Growth of groups of wind generated waves	335
M. Z. Elmas, T. Mukherjee, G. Alexandre, and V. Alexiades A two pathways model for chemotactic signaling in <i>Azospirillum</i> <i>Brasilense</i>	345
Basu Dev Ghimire and Ram Prasad Ghimire Reliability and availability of machines with two types of failures operated under periodic surveillance test	359

Ram Ghimire, Samir Shrestha, Oliver Tse, and Shyam Sundar Sah Transient analysis of Markovian queue with flexible servers balking	375
Sushil Ghimire, Gyan Bahadur Thapa, and Ram Prasad Ghimire Finite capacity M/M/r/N queueing model with additional servers	385
Dadang Hamzah, Johan Tuwankotta, and Yudi Soeharyadi On the numerical solution of Fisher's equation by iterative operator-splitting method	395
Mark Miller and Hem Raj Joshi Modeling harmful algal blooms in the western basin of lake Erie and an economic solution	403
Ashok Misra Modeling boundary layer flow and heat transfer of a particulate suspension	417
Shiv Prashad Neupane and Dil Bahadur Gurung Stability analysis of May's two prey and two predator model	435
Benedict Pineyro and Harihar Khanal Super time-stepping schemes for conduction-radiation heat transfer problem	457
Urmila Pyakurel Efficient algorithms for contraflow reconfiguration in evacuation planning	469
Shyam Sundar Sah and Ram Prashad Ghimire Reliability of general series-parallel and sequential series-parallel systems and their optimization	485
Ramjee Sharma On the numerical solutions of 2d Boussinesq equations with fractional dissipation	497
Subhash Shende, Mohan Kale, and Nikhil Gupte Modeling maternal-infant HIV transmission with lag time distributions exponential, geometric and shifted geometric	509
Content	523
