Neural, Parallel, and Scientific Computations

Volume 26, 2018

CONTENTS

Syed Abbas, Anibal Coronel, Manuel Pinto, Swati Tyagi **1-29**
Exponential Approximation of Solutions of Bidirectional Neural Networks Model With Positive Delay

Md Shafiqul Islam **31-51**
An Alternative Elementary Method for Approximation of Invariant Measures for Random Maps

Ali Boussayoud, Abdelhamid Abderrezzak, and Philip B. Zhang **53-64**
Symmetric Functions for Families of Generating Functions

Zvi Retchkiman Konigsberg **65-74**
Modeling and Verification Analysis of a Flexible Manufacturing System: a Modal Logic Approach

P. Prathusha, S. Jyothi, and D. M. Mamatha **75-94**
A Hybrid Implementation of Multiclass Recognition Algorithm for Classification of Crabs and Lobsters

D. Kumar **95-118**
A Collocation Scheme for Singular Boundary Value Problems Arising in Physiology

Jewgeni H. Dshalalow and Kizza M. Nandyose **119-141**
Continuous Time Interpolation of Monotone Marked Random Measures with Applications

O. Lawrence Omondi, O. E. Achieng, T. A. Mwende, and Lawi G.O. 143-168
Modeling Malaria and Rotavirus Co-Infection

Svetoslav Markov, N. Kyurkchiev, A. Iliev, and A. Rahnev **169-182**
On the Approximation of the Cut Functions by Hyper–Log–Logistic Function

N. Balasubramani, M. G. P. Prasad, and S. Natesan **183-210**
Rational Cubic Fractal Spline for Visualization of Shaped Data

O. M. Nathan, G. O. Lawi, and J. K. Nthiiri **211-224**
Modelling the Dynamics of Radicalization with Government Intervention

Olga Rahneva, , H. Kiskinov, H. Melemov, and M. Stieger **225-235**
Some Approximation Aspects for a New Class Cumulative Distribution Functions

Olga Rahneva, H. Kiskinov, H. Melemov, A. Stieger **237-246**
On the Approximation of One Class of Impulse Functions

P. Ram Mohan Rao and A. Mounika **247-256**
Recommended System of Collaborative Filtering Based in Social Networks

Vesselin Kyurkchiev, H. Kiskinov, O. Rahneva, and G. Spasov **257-267**
A Note on the Exponentiated Exponential–Poisson Software Reliability Model

Nikolay Pavlov, Anton Iliev, A. Rahnev, and N. Kyurkchiev **269-278**
Sensitive Analysis on Some Transformations to Construct a Generalized 2–Component Weibull Distribution

Yousef Alnafisah **279-296**
The Implementation Result of Approximate Coupling in Three-Dimensional SDE with Invertible Diffusion

Olga Rahneva, Hristo Kiskinov, A. Malinova, and G. Spasov **297-310**
A Note on the Lee–Chang–Pham–Song Software Reliability Model

Andrey Antonov, Svetoslav Nenov, and Tzvetelin Tzvetkov **311-326**
State-Space System Identification Problem for Some Nonlinear Biological Models

Javad Alidousti, Ali B. Eshkaftaki, and Reza K. Ghaziani **327-343**
Stability and F-asymptotic Stability Analysis of Nonlinear Fractional Order Systems with Riemann-Liouville Derivative

Maria Malinova, Angel Golev, and Asen Rahnev **345-353**
Speeding up the Generation of Near-rings on Finite Cyclic Groups Using Parallel Processing in C#

Anton Iliev, Nikolay Kyurkchiev, and Asen Rahnev **355-362**
A New Improvement Euclidean Algorithm For Greatest Common Divisor. I

Content **363-364**

Author Index **365-366**
